

Fluorescent Bulb and Ballast Recycling

Many commonly-used lamps contain small amounts of mercury and other metals. Such lamps include fluorescent, high-pressure sodium, mercury vapor, and metal halide lamps. These types of lamps cannot be disposed with regular trash, and should be recycled by a permitted facility.

The vendors below specialize in recycling fluorescent lamps and ballasts. Call vendors directly for current prices and details. Many will provide packaging and/or pick-up services. Ask the vendor to provide a certificate of recycling for your recycled lamps.
